Acceptable File Formats

All layers and transparencies must be flattened prior to submission.

All Objects must have overprint turned OFF.

Following is the list of all acceptable file types (formats)

PDF, TIFF, JPEG, EPS, AI and PSD

Recommended Design Softwares

We recommend the following applications for maximum design quality and the best print results:

Adobe Illustrator®, Adobe Photoshop®, Adobe In Design®, Quark Express® and Corel Draw®

(Corel Draw files must be exported as one of the following formats: High Resolution PDF,

JPEG, TIFF, EPS or AI and make sure all fonts are converted to curves)

Resolution of Files

We require a minimum resolution of 100-150 dpi at 100% print size, or 200-300 dpi at 50% print size on all Raster Based designed and submitted files such as TIFF, PSD, JPEG & etc.

Vector based files such as EPS or AI.

Resolution is irrelevant and files can be reduced or enlarged to almost any size without loosing print quality.

Colour & Text

Please, Work & Save your design in CMYK MODE. RGB may shift colours.

(DisplayOne is not responsible for any colour shift).

We recommend that you convert all fonts to Outlines / Curves where possible before submitting your design art file, if not please include all fonts used in File.

File transfer

E-mail: file@display1.com.au (up to 30 MB)

Online File Trasfer: 1. www.wetransfer.com 2. Add files 3. Transfer to file@display1.com.au
